File Na	File Name:				
O Append to log file					
Require comments on commit Source file encoding in ws_objects: UTF8 Advanced					
OK	Can	cel Apply Help			

3) On my local I have a master branch and access to the branches in Azure Devops.

💪 Switch Branch		×
Please select the branch that you want to	switch to.	
master	~	
master		
origin/development origin/development-featu origin/master		
	OK	Cancel

How can I push changes from My local Master to Origin/Development or Origin/Development Feature in Azure DevOps?

How do I pull the changes from the Azure DevOps into my local Master branch to checkout and make changes?
